DETAILED ACTION

Response to Arguments

1. The Applicant's arguments filed on February 4, 2008 have been fully considered.
2. As per claims 1-18 the Examiner agrees that limitations of claims 1-18 are not disclosed in any prior art references.

Allowable Subject Matter

3. Claims 1-18 are allowed over the prior art record.
4. The following is an examiner's statement of reasons for allowance:
5. The closest prior art of record Brown et al. (US Patent 6,601,041) teaches a method of providing targeted advertisements to a computer mediated communications network.
6. None of the art of record, taken individually or combination disclose at least the steps/components of: wherein the electronic information contents includes user selected topics and user selected web pages, and advertisement information related to a region of the user, an age of the user, the topics that the user selected, and the web pages that the user selected wherein when an access rate of the electronic information contents increases, advertisement income is projected, and a price for the service is decreased, wherein when two or more display times overlap, the information provider adjusts a connection time zone to prevent overlap of two or more connection times; wherein said information processing apparatus is automatically activated at a startup.
7. Even if the features missing from the above cited prior art were found in a reasonable number of references a person of ordinary skill in the art at the time of the invention would not have been motivated to combine these reference because the feature of adjusting a connection

Art Unit: 3621

time zone to prevent overlap of two or more connection times is not common to electronic content distribution with advertisement information; the examiner concludes that the additional step of adjusting a connection time would be disclosed by non analogous art and therefore non-obvious.

8. Claims 1,6,12 and 14 are allowable for the above cited reasons.

9. Claims 1-5, 7-11, 13 and 15-18 are dependant upon claims 1,6,12 and 14 respectively and are therefore allowable for at least the same reasons.
